

Isaac Lee — G9 Term 1 Master Teaching Plan (2026–27)

Headway booklet-driven · 11 weeks · exam at Week 11 · built on his complete error history (Apr–Aug 2026)

Student: Isaac Lee · G.T. College (entering G9) **Baseline:** G8 T1 Headway 53% → T2 46% **Aug 2026 level:** 82% batch average (4 worksheets)

Target W11 exam: Headway ≥ 70%

1 · Where Isaac Stands Right Now (Aug 2026)

✓ Closed gaps — keep warm with light retrieval, do NOT re-teach

- **Conditionals (all types + subjunctive *were*)** — Aug 8: 15/15 on identification & correction. Was 25% on June mock.
- **Adj vs Adv (the Verb Test)** — 3-month gap closed Aug 8. Production 58% → 88% on the same words.
- **Irregular verbs core set** — leaved→left ✓, hitte→hit ✓, bring→brought ✓ (Aug 15).
- **SVA recognition** — 7.5/8 (police are ✓, neither/nor knows ✓, fruit is ✓).
- **Modal verbs** — 6/6 perfect on T2 exam (his strongest paper section ever).

● Open gaps — the G9 plan must fix these

- **Past participle after have/had:** "have wrote" → written (Aug 15). All-Different verbs: write/take/break/forget.
- **Continuous passive:** "was tested" for "was BEING tested" — new G9 structure (booklet p.13 has it).
- **a/an by SOUND:** "an honest" missed 3+ times despite cheat sheet. Silent-h + /j/ drill needed.
- **SVA -s in free production:** "the product make", "system work" — recognition fine, production drops it.
- **Noun-form derivation:** unique→uniqueness, simulate→simulation, digest→digestion misuse (4×).
- **Over-correction bias:** flags CORRECT sentences as wrong (Aug 15, new). Confidence calibration needed.
- **Vocab deployment in production:** swaps target words (commitment→confidence) or builds semantically odd sentences.

2 · The 11-Week Map (tutoring ↔ school booklet ↔ quizzes)

- "would have not" → "would not have" word order · "might have been won" structure
- at the party / at the corner of / in proximity to — event vs location precision
- ALL error threads resurface in mock — June mock was 49%, target ≥ 75%
- Final check routine: scan every verb → he/she/it -s? · have/had + V3? · one conjunction only?

Wk	School focus (booklet)	Tutoring session focus	Past-mistake thread (spaced retrieval)	Homework (self-done)	Milestone
1	Lead-in Unit 1 · tense system intro (p.3–5)	The Tense Engine. 12-tense map + signal words; past perfect vs past simple in stories; diagnostic micro-check on residual errors	have wrote→written · was→had been (June mock) · over-flagging calibration ("T is a real answer")	Tense Tune-Up worksheet (T/F + gap story + fix-your-errors + 3 sentences)	Diagnostic baseline logged
2	Tenses & signal words · Unit 1 reading (Saroo / <i>Lion</i>)	Perfect vs Perfect Continuous (p.9, 21–22) + Unit 1 vocab pre-teach (12 words: <i>wander around, fateful, sleeping rough, notorious, strike gold...</i>)	PP after have (write/wrote/written) · SVA -s in free production ("the product make")	Unit 1 vocab-in-context cloze + PP tense choice exercise	Unit 1 vocab ≥10/12 recognition
3	Active ↔ Passive voice (p.12–14)	Passive Full Map. All tenses passive; NEW: <i>was being</i> + V3 (continuous); choosing the right subject (patient-first); by-phrase logic	"our body can be digested most of the food" (subject reversal) · meals WAS prepared · might be organize→organized	Active↔passive conversion set incl. 3 continuous-passive items	Continuous passive 3/3
4	Preposition of place (p.15–17) · GTR lead-in	GTR Quiz #1 pre-teach. Social-injustice vocab (plead, threaten, notorious, illiterate, sinister, supercilious...) + reading detail-extraction strategy (quote the line)	a/an by sound (an honest / a university / an hour) — dedicated drill, 4th exposure	Mock GTR set A (vocab cloze + detail questions, self-timed 25 min)	Mock GTR ≥ 70%
5	🏠 GTR QUIZ #1 (social injustice list) · preposition of direction (p.23)	Post-quiz autopsy + prepositions of direction. Grade returned quiz together; map every lost mark to an error type; toward/onto/through passage work	Whatever the quiz reveals (log new errors to Vocab Bank same day)	Direction-preposition story cloze + error-log page (write down YOUR 3 most common mistakes)	Quiz #1 result logged
6	🏠 HEADWAY QUIZ #1 (Unit 1 vocab + tenses) · preposition of time (p.26)	Exam-eve consolidation → autopsy. Signal-word sprint + Unit 1 vocab production sentences (exact-word-form rule); after quiz: full error analysis	Vocab deployment: use the TARGET word, not a synonym (commitment→confidence lesson); uniqueness/simulation noun forms	Unit 2 vocab preview (12 words: devastating, isolate, lethal, pristine, gobble...) + tense mixed cloze	Quiz #1 Headway ≥ 70%
7	Modal Verbs 1 (Unit 7 · p.25) · metaphors & idioms intro	Modals Upgrade. From T2's 6/6 baseline → semi-modals (<i>ought to, had better, needn't</i>) + modal perfect (<i>should have considered</i>); interview-context practice (booklet p.25)	Modal cloze (booklet p.30 style) + 5 modal-perfect corrections	Modal perfect 4/5+	

8	🏠 GTR QUIZ #2 (Oliver Twist list: benefactor, swindler, apprentice, convict, hierarchy...) · preposition of time proofreading (p.27)	Literature answer formula. T2 lit-analysis was 0/6 — teach P·Q·E frame (Point → Quote → Explain) with Oliver Twist; time-preposition proofread (booklet p.27 "cultural day" text)	grateful of→for · in our party→at · during Ø typhoon (preposition errors from May)	Oliver Twist vocab cloze + 3 P·Q·E answers	P·Q·E frame applied 3/3
9	Modal Verbs 2 (p.30) · prepositions consolidation	Preposition Triathlon. Place + direction + time mixed; beside/next to/near nuance; "Why so serious?" email rewrite (idiom + prep combo)	Mixed preposition proofreading + idiom gap fill (give me a hand, pulling my leg...)	Prepositions ≥ 80%	
10	Unit 10 idioms (p.28–29) · Present perfect simple vs continuous (p.21–22) · Unit 2 reading (microplastics)	Full Mock Exam. 3-set G.T.-format mock (tenses/passive · word form & SVA · prepositions & vocab) under timed conditions; self-mark with watch-list	Mock paper completion + error-log page + Unit 2 vocab final pass	Mock ≥ 75%	
11	🔥 TERM 1 EXAM (Unit 2 vocab + perfect tenses + prepositions + modals)	Exam-eve toolkit. Error watch-list final pass (his top 8); time-management playbook (attempt order, no blank Part Cs); question-type recognition drill; confidence calibration (over-flagging antidote)	Light: watch-list read-through + 10-min mixed warm-up only (no new content)	🎯 EXAM ≥ 70%	

3 · Progress Tracking Framework

What gets recorded every week (updated in 00_Student_Master_Log.md)

- **Homework score** — each week's worksheet graded (/20), target ≥ 80% sustained.
- **Error-type tally** — every mistake classified 🟡 Slip / 🔴 Gap / 🟠 Interference / 🟢 Mastery and added to Vocab Bank hotlist.
- **Production accuracy panel** — 3 tracked metrics every single assignment: (1) SVA -s retention in free writing, (2) PP forms after have/had, (3) false-flag count (over-correction bias).
- **School quiz results** — W5, W6, W8 quizzes + W11 exam: autopsied item-by-item, mapped back to the plan.

KPI targets

- Weekly homework: ≥ 80% (Aug level: 82% — hold it under rising difficulty)
- W5/W6/W8 quizzes: ≥ 70% each (G8 T1 baseline was 53% / 47%)
- W10 mock: ≥ 75% (June mock: 49%)
- W11 exam: ≥ 70% — stretch 75%
- False flags (correct sentences marked wrong): ≤ 1 per assignment by W6, 0 by W10
- Zero blank sections — no avoidance (June mock lost 7 marks to a skipped Part C)

4 · Past-Mistake Recycling Schedule (so nothing fades)

Error thread	Origin	Revisited in weeks
have wrote → written · had forgot → forgotten (PP after have)	Jun 15, Aug 15	1, 2, 6, 10, 11
was being tested (continuous passive)	Aug 15	3, 5, 10, 11
an honest / a university (a/an by sound)	Apr–Aug (3×)	4, 8, 10, 11
SVA -s in free production	Aug 15	2, 6, 9, 11 (every production task)
unique→uniqueness, simulate→simulation (noun forms)	Jun 17	6, 8, 10
grateful FOR · at the party · during a typhoon (prepositions)	May 16	8, 9, 11
Over-flagging correct sentences (confidence calibration)	Aug 15	1, 4, 6, 11 (every T/F task)
Vocab substitution under pressure (commitment→confidence)	Aug 8	6, 8, 10 (exact-word production tasks)
June errors now FIXED (conditionals, leaved/hitted, police are) — celebrate + light retrieval only	Jun–Aug	1, 7, 10 (warm-ups)

5 · Risk Watch

- **Over-correction spiral** — error-hunting practice made him flag correct sentences. Counter: every T/F set includes deliberately correct items; teach "T is a real answer, not a trap."
- **Avoidance returns under exam pressure** — June mock: entire 7-mark section blank. Counter: W10 mock under real time pressure + "no blank lines" rule (write something, flag it, come back).
- **New-rule over-application** — pattern seen twice (verb→-ly, then adj-overuse). When teaching *was being* + V3, immediately teach its boundary (only when action is IN PROGRESS).
- **Vocab volume jump** — G9 lists are harder (supercilious, patronizing, premonition). Counter: pre-teach BEFORE school covers it (weeks 2, 4, 6, 8, 10) so he meets each word twice.
