

Week 1B Lesson Materials — "The Voice Switching Station"

Tutor-facing session plan · Isaac Lee · G9 Term 1 · bridge session: tense engine → active↔passive switching · feeds directly into the Rule Switch Challenge homework

⌚ 60 min

🔗 doer-test · be = 時態搬運工 · switch discipline

📄 word strips + timer + board + mini whiteboard

📄 Homework: Rule Switch Challenge (separate) · 🌐 2 webgames

Session Objective

By the end of the session Isaac can (1) apply the **doer-test** to decide a sentence's voice direction in under 5 seconds, (2) convert active↔passive while keeping the tense — because he understands **be is the tense carrier** (be 係「時態搬運工」— active 時 tense 住在 verb 度, passive 時 tense 搬咗入 be 度), (3) catch the three voice crimes: **missing be** · **extra be** · **intransitive passive**, and (4) **restart his decision on EVERY question** — the anti-autopilot habit the homework will test.

0 · Arrival Diagnostic

5 min

Three quick questions on paper — do NOT teach first:

- I ____ (write) three essays this month. (*residual: PP after have — he wrote "wrote" Aug 15*)
- The meals ____ (prepare) by mum yesterday. (*residual: SVA inside passive — he wrote "was" Aug 15*)
- True or false: "The bus was arrived at 8 a.m." (*NEW: intransitive trap — no object → no passive*)

3/3 → compress Step 2 to 10 min, give Game 2 extra rounds. ≤1 → teach Step 2 slowly, rebuild from last session's tense grid.

1 · Game 1 — "Doer or Done-To? 快手拍檯"

8 min

🎮 **Warm-up physical game — trains the doer-test until it's reflex · INTERACTIVE: open webgames/lesson_game1_doer_done_to.html (phone/tablet/laptop) — no printing needed**

Setup (digital): tap START — the sentence appears, timer runs. Isaac taps ● DOER (active) or ● DONE-TO (passive). Correct tap = green flash + explanation; wrong = red flash + why. Every game reshuffles the 12 sentences. ★ Q11 (modal passive) is worth double; ★ Q12 (rice grows) opens a discussion box.

Paper fallback: table split into two zones, read aloud, he slaps the zone. Same 12 items below.

Scoring: +1 per hit · discussion cards (★) worth double **with** a spoken explanation. Target ≥9/12.

Sentence (read aloud)	Slap	Note
1. The dog bit the postman.	DOER	dog does the biting
2. The postman was bitten by the dog.	DONE-TO	by-phrase = clue
3. Mum cooks dinner every night.	DOER	
4. Dinner is cooked by mum.	DONE-TO	
5. Charles broke the window.	DOER	
6. The window was broken in the storm.	DONE-TO	no by-phrase — still passive!
7. We watched a film.	DOER	
8. The film was watched by millions.	DONE-TO	
9. The fireman put out the blaze.	DOER	his Jun-5 crime — now correct
10. The blaze was put out by the fireman.	DONE-TO	
11. ★ The homework must be finished tonight.	DONE-TO	modal passive — be still there after must
12. ★ Rice grows in this village.	discussion	stretch: grow here = "生長" (intransitive) — active even though rice isn't doing much. Great "English is weird" moment.

Debrief line: 「你喺嗰做嘅動作就係 doer-test — 每一題都由頭判斷一次，唔可以靠上一題嘅手勢！」

2 · Main Teaching — The Voice Switching Station

15 min

2a — Build the machine together (7 min). Draw the two-way machine on the board (see board plan). Isaac fills the arrows himself. The ONE insight to land:

be = 時態搬運工 (the tense carrier). Active 時, tense 住在 verb 度 (prepares / prepared) 。一轉 passive, tense 就要搬入 be 度 — be 會變身: is / was / will be / has been / is being 。Verb 就永遠只做 V3 。 所以刪 be 嘅時候, tense 冇跟住走 — 要你自己搬返落 verb 度! 呢個就係佢成日忘記嘅位。

Board demo — he underlines where the tense hides in each pair:

Tense	ACTIVE (tense in verb)	PASSIVE (tense in be)
present	The chef prepares sushi.	Sushi is prepared.
past	The chef prepared sushi.	Sushi was prepared.
future	The chef will open... wait — will carries it too.	The pool will be opened.
perfect	Mr. Chan has sent the email.	The email has been sent. (功課 B6 同款結構 — 堂上用唔同句子)

2b — Boundary teaching, SAME session (5 min). His known pattern: learns a rule → over-applies it. So teach when passive is IMPOSSIBLE today: intransitive verbs (arrive, happen, die, come, sleep) have no object → nothing to become the subject → never passive. Quick "it-test": can you say "arrive it"? "happen it"? No → no passive. 「was arrived」呢類罪永遠唔可以發生!

2c — The 5-second check ritual (3 min). After EVERY conversion he says it aloud: ① be 冇多冇漏? ② be 對緊邊個 subject (SVA) ? ③ V3 用咗未? Drill the rhythm 3× on the board examples.

3 · Game 2 — "Switch 抽卡王"

15 min

Main game — shuffled direction cards. The shuffle IS the training. INTERACTIVE: open webgames/lesson_game2_switch_card_king.html — split view: tutor side (answers + key points + card ID grid) vs Isaac side (face-down card that flips to reveal only the colour chip). No cutting paper.

Setup (digital): you hold the device OR pass it after each reveal. Tap 抽下一張 — Isaac's side flips to show ONLY the chip colour; your side shows the sentence, the model answer and the teaching point. Tap any card number to revisit for recap. 重新洗牌 for a fresh shuffle.

Play: Isaac announces the chip colour OUT LOUD before writing — verbal labelling builds the switch habit — then converts/judges on the mini whiteboard within ~30 seconds.

Scoring: →P →A convert: +2 (structure + tense both right) or +1 (structure right only) · JUDGE : +2 (correct + can name why) · Boss cards ✕ are worth double. Pass mark: 20 pts.

Card	Chip	Sentence	Answer / key point
1	→P	Mum waters the plants every evening.	The plants are watered by mum every evening.
2	→A	The window was broken by the boys.	The boys broke the window. (tense moves back into verb)
3	JUDGE	The thief was arrested by the police last night.	✓ correct passive
4	→P	The students cleaned the classroom after school.	The classroom was cleaned by the students after school.
5	→A	Rice is grown in this village.	People grow rice in this village. (agentless → invent "people"; grows, no -s!)
6	JUDGE	We were enjoyed the party very much.	✗ extra be — enjoy needs an object; "We enjoyed the party."
7	→P	Somebody took Charles's umbrella by mistake.	Charles's umbrella was taken by mistake. (somebody disappears)
8 ✕	→A	The email has been sent by Mr. Chan.	Mr. Chan has sent the email. (perfect passive boss — has + V3)
9	JUDGE	The train was arrived at platform two at 9 a.m.	✗ arrive has no object → never passive → "The train arrived..."
10 ✕	→P	The inspector was testing the students during lunch break.	The students were being tested by the inspector during lunch break. (continuous passive — his Aug-15 crime family)
11	→A	The new swimming pool will be opened next month.	They will open the new swimming pool next month.
12	JUDGE	The medicines are tested by scientists every year.	✓ correct — incl. SVA (medicines are). Anti-over-flag card!

Switch-point tally (for Onion — do NOT show Isaac): whenever two+ cards in a row share a colour and then the colour CHANGES, tick whether the switch card was wrong. 3+ switch-point errors = autopilot confirmed → keep interleaving in every future sheet. 0–1 = the errors are rule-knowledge, not switching → drill be+SVA deeper.

4 · Error Surgery — His Own Crime Family

8 min

Three quick whiteboard fixes. NEW sentences, same crime types as the homework's Part C (don't reuse the exact homework items):

- ✗ "The players praised by the coach after the match." (missing be — same crime as "gets criticize") → were praised
- ✗ "The teacher was taught the students English." (extra be + wrong patient) → The teacher taught the students English.
- ✗ "The books was arranged on the shelf." (SVA inside passive) → were arranged

He must run the 5-second check aloud after each fix. Self-repair first — ask "be 對緊邊個?" before you correct anything.

5 · Wrap-Up — Calibration + Homework Briefing

6 min

Autopilot warning (say it verbatim): 「呢份功課嘅題目方向係特登亂排嘅。你個腦會想自動 pilot — 用完一條 key 就想開晒所有門。記住：用完一條 key，要鎖返，先可以開下一道門。每一題都係新一局！」

Webgame briefing: tonight play 🚦 **SWITCH FACTORY** (webgames/switch_factory.html — sentence factory minigame: sort crates, judge inspections, rebuild boss crates) — instant feedback, score + lives + combos. Homework = 正式賽, do it AFTER the game, no help.

Anti-over-flagging reminder: some Part A sentences are correct on purpose. Can't NAME the error → it's ✓.

Homework logistics: Rule Switch Challenge — Part A 8 marks, Part B 12, Part C 4, Part D +6 bonus, ~30 min. Answer key on its own page, check AFTER finishing, honestly.

Board Plan

VOICE SWITCHING STATION — 兩向機器

ACTIVE
(tense lives in VERB)

PASSIVE
(tense moves into BE)

add be+V3

delete be
(tense moves BACK to verb!)

chef prepares | sushi IS prepared |

chef prepared | sushi WAS prepared |

BE FAMILY TREE (the tense carrier 變身表):
am/is/are · was/were · being · been · will be · has been

DOER-TEST: 主語做唔做動作?
doer → ACTIVE → 冇 be (有就刪)
receiver→ PASSIVE → be + V3 (一定有)

INTRANSITIVE = NO PASSIVE, EVER: arrive · happen · die · come
test: "arrive it"? X → 永遠冇 passive

Error-Handling Cues (if you see... → do...)

- ⚠️ Converts but drops V3 ("was prepare") → point at be: "be 搵咗 V3 未?" Let him self-repair.
- ⚠️ Adds be but keeps the doer subject ("The chef was prepared sushi") → re-run doer-test: chef 做唔做 cook? → 根本唔使轉。
- ⚠️ Over-passivizes everything after the lesson (his new-rule pattern) → boundary drill: "___-it" test on arrive/happen/die — no object → no passive.
- ⚠️ Fails right after a colour switch in Game 2 → drop the timer, have him SAY the direction aloud before writing ("purple! add be!") for the next 3 cards.
- ⚠️ SVA inside passive ("the books was") → "be 對緊邊個 subject? 佢係咩數?"

After-Session: Record These (Master Log)

- Diagnostic score (0–3) — tense/passive residuals baseline
- Game 1 score /12 · Game 2 score /26 (pass mark 20)
- Switch-point error count** — THE key metric this week (autopilot diagnosis)
- False-flag count (target ≤1) · Surgery fixes /3
- Webgame results if played in-session (Traffic Light /10 · Boss Rush stars) · Homework due date
