

Storm-route school rescue · tutor plan

Isaac · G9 T1 W5 · Set A · 60 minutes · direction, GTR retrieval, tense carry

School alignment: G9 Term 1 · Week 5 · booklet p.23 direction prepositions: **toward / onto / under / away from / through**. GTR Quiz #1 spelling words follow the separate school 2026–27 Spelling Quiz Vocabulary List supplied by Onion (Week 5 row), not the booklet p.2 column reading. This is a face-to-face lesson; teacher guides before independent work.

Arrival diagnostic · 5 min · before any teaching (3 items)

Show individually, no hints. Ask Isaac to say the clue, then note 0–3; do not count this in worksheet /20.

1. At that instant, the flood map ____ (carry) upstairs. **Key:** was being carried (instant in progress).
2. Before the warning bell rang, the gates ____ (lock). **Key:** had been locked (earlier past).
3. The monitor headed ____ the covered path but had not reached it. **Key:** toward (approach, not arrival).

Decision: 3/3 → shorten tense reminder later; ≤1/3 → use two extra oral contrast examples in the 10-min retrieval block, not a passive-basics re-lesson.

60-minute tutor-led route

0–5 | Arrival diagnostic (5) — as above. Record which clue was lost.

5–14 | W4 return + conditional quiz autopsy (9) — Onion sent only the original W4 practice pack page 2: Stations 2–4 provisionally 30/40, NOT the whole /46 or a school quiz score. Ask Isaac to explain one self-repair in his own original work; select at most two errors. The newly revised W4 pack has different vocabulary questions, so never remark the original scan against it. If the actual marked GTR quiz exists, record its date, actual mark and 1–2 item types separately; otherwise leave that school result pending and use a neutral oral check.

14–34 | Direction lesson (20) — 4 min tutor models paths with pen and paper; 5 min movement vs position sort; 8 min jointly do class worksheet Zone 2 with Isaac speaking why; 3 min independent transfer into Zone 3. Teach **toward** approach, **onto** onto a surface, **away from** increasing distance, **through** entering and exiting, **under** below. **Boundary:** under can name a static place; *on/at/in* describe location, not a journey. **Onto** requires movement; at the platform and on the shelf can be correct already. If he over-corrects, ask “What moved? From where to where?”

34–44 | GTR 12-word spelling drill (10) — Without a word bank, dictate a brief meaning for each school Week 5 word; Isaac writes all twelve spellings, unscored: *social injustice, tilt, apprentice, prosperous, plead, expectation, convict, dismal, threaten, glare, hierarchy, sanitation*. Use the remaining minutes to ask how apprentice differs from convict, dismal from prosperous, and glare from tilt in context. Correct form and meaning, but do not report this as the school quiz.

44–54 | Mixed tense retrieval (10) — Class worksheet tense items, then oral triple contrast: yesterday *was* + V3; while the whistle blew *was being* + V3; before the whistle *had been* + V3. Alternate active/passive and one already-correct sentence. Ask for time clue before form; don't re-teach voice basics.

54–58 | In-class quick-fire (4) — Open `class_game.html`; sentence → say full answer aloud → reveal why → self-mark → next. Use missed report for one final correction. Eight or nine cards can be played briskly; stop at 58 if unfinished.

58–60 | Handoff (2) — Give home worksheet (/20, ~20–25 min) and home game (optional extra). Explain exact-word rule and separate answer key page; ask Isaac to self-mark in another colour after finishing.

Board plan · one contrast at a time

MOVEMENT? toward = approach | onto = move to surface | away from = distance grows | through = enter → exit

PLACE? under / on / at / in = position can remain unchanged

TIME? yesterday: was/were + V3 | while: was/were being + V3 | before: had been + V3

Feedback prompts: “Did it move or stay?”; “Does it pass the far end?”; “Which event happened first?”; “Can you name a real error, or should this stay T?” If *was* + V3 appears for an ongoing past event, point to “at that moment,” not the formula first.

After lesson, record only observed evidence: diagnostic /3, class /20, home /20 when returned, false flags, exact-word production, tense switch-points and any real school quiz score/paper if seen. Do not update historical scores from generated materials.
