

W3 Set B 教學計劃 — Loftcube 天裝之城（被動 tense-carry + 連續被動）

Student: Isaac Lee (8E) · 60 min · 主線: W3 被動 (move-on 判決後) · book 連結: booklet pp.12–14 Loftcube 原文主題 · 材料: class ws 20分 · home ws 20+3 · 堂上快問快答 · 屋企 minigame

Arrival Diagnostic (教書前 3 題 — 3/3 壓縮進度, ≤1 放慢)

題目	期望答案 / 觀察點
→主動: The bathrooms are being fitted by a German company.	is/are fitting — 連續被動搬主動進行
→被動: Somebody had taken the old lift out.	had been taken — past perfect 被動
判斷: The cubes can moved from city to city.	F — can be moved ; modal 後面 be 唔可以慳

60 分鐘流程

- 0–5** 學生主導 check-in 。
- 5–12** Arrival diagnostic ×3 , 記 hint level 。
- 12–22** 主題教學: be = tense 容器 (board plan) ; 用 booklet Loftcube 原文例子展示「有格係主動」— 邊界唔好 over-apply 。
- 22–25**  堂上遊戲「天裝快答」12 快題。
- 25–45** Class WS Part A→D ; Part C 故事 6 格有 3 格係主動 — 觀察 over-application 。
- 45–53** Error surgery + switch-point 記錄。
- 53–60** Exit check + 派 home ws 。

Board Plan

主動: S + V(tense) + O 被動: O + be(tense) + V3 (+ by S)

modal / future 條 be 一格都唔可以慳:

can be moved | will be connected | must be finished

連續被動 (本週 milestone, 目標 3/3):

is being fitted ⇌ is fitting (present cont)

was being taken ⇌ was taking (past cont)

Error-Handling Cues (優先 self-repair , 用問題引導)

寫咗 **can moved** → 問: 「modal 後面親戚順序: modal + ____ + V3 , 中間嗰格係乜?」

寫咗 **was taken out** 當進行 → 問: 「原句有冇講緊嗰刻進行緊?」

見 active 句都變被動 (Part C 1/5/6) → 問: 「主語係 doer — 做嘢嗰個使乜變被動?」

亂 flag → 「講得出錯處名先好改。」

 Part C 嘅主動格 (1 have worried / 5 bought / 6 lives) 係 over-application 探測器 — 錯喺呢啲格 = 新規則 over-apply , 記入 Master Log 並即場教邊界。
